

AI-Powered Job Recruitment & Candidate Management System

User Story:

As a **Recruiter and Hiring Manager**, I want to efficiently manage the entire recruitment process using the **AI-Powered Job Recruitment & Candidate Management System (AIRCMS)**.

I want to easily create, access, and update candidate profiles, job openings, interview schedules, and hiring records from a centralized Salesforce application, enabling seamless collaboration throughout the hiring lifecycle.

Additionally, I want the application to automatically evaluate candidates using AI-generated scores, summaries, and hiring recommendations, allowing me to quickly identify high-potential candidates and make informed recruitment decisions.

Moreover, I require the system to automate recruitment workflows, including candidate status updates, email notifications, interview management, and offer approval processes, ensuring faster, standardized, and error-free hiring operations.

Lastly, I would like the application to provide comprehensive reports and dashboards that summarize recruitment performance, candidate pipelines, hiring trends, and approval statuses, enabling data-driven decision-making while improving recruitment efficiency, transparency, and overall candidate experience.

INTRODUCTION

1.1. Project Overview

The AI-Powered Job Recruitment & Candidate Management System (AIRCMS) is a Salesforce-based recruitment management solution that automates and optimizes the complete hiring process. The application integrates Salesforce Admin features, Flows, Approval Processes, Lightning Experience, and Agentforce AI to create a centralized platform for managing job openings, candidate applications, interviews, hiring approvals, and onboarding activities.

The system leverages AI to analyze candidate information, generate intelligent candidate scores, provide hiring recommendations, and automate repetitive recruitment tasks. Recruiters can efficiently identify high-potential candidates through AI-generated insights, while hiring managers can make informed decisions using automated approvals, interview summaries, and real-time dashboards.

By eliminating manual screening, reducing hiring delays, and enforcing standardized recruitment workflows, AIRCMS improves recruitment efficiency, enhances decision quality, and provides a scalable and secure solution for organizations handling high-volume hiring.

1.2. Purpose

The primary purpose of the AI-Powered Job Recruitment & Candidate Management System (AIRCMS) is to simplify and automate the recruitment lifecycle while improving the accuracy and consistency of hiring decisions.

The system aims to:

- Automate candidate screening using AI-powered evaluation and scoring.
- Centralize recruitment data, including candidates, job openings, interviews, and hiring approvals.
- Reduce manual effort through Salesforce Flow automation and Approval Processes.
- Assist recruiters by providing AI-generated candidate summaries and hiring recommendations.
- Enable hiring managers to review salary approvals, interview performance, and recruitment insights through structured dashboards.
- Improve collaboration among recruiters, hiring managers, and HR teams.
- Ensure secure, role-based access to recruitment information.
- Support scalable recruitment operations while maintaining transparency, compliance, and data integrity.

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Recruiter	Screen and identify the most suitable candidates quickly	Resume screening and candidate evaluation are time-consuming and inconsistent	Candidate assessment is performed manually, making it difficult to identify the best applicants efficiently	Overwhelmed and less productive

PS-2	Hiring Manager	Review candidate performance and approve hiring decisions efficiently	Hiring approvals and interview evaluations are delayed	Recruitment data is scattered across multiple processes and lacks standardized insights	Frustrated and uncertain
PS-3	HR Administrator	Monitor recruitment activities and generate recruitment reports	Recruitment progress and hiring analytics are difficult to track	Recruitment information is not centralized, and reporting requires significant manual effort	Stressed and unable to make timely decisions
PS-4	Candidate	Stay informed about my application status throughout the hiring process	I receive delayed or inconsistent communication regarding my application	Recruitment updates are managed manually without automated notifications	Anxious and disconnected from the recruitment process

2.2 Empathy Map Canvas

Target Users

- Recruiters
- Hiring Managers
- HR Administrators
- Candidates

Empathy Analysis

Aspect	Description
Think & Feel	Want to recruit the most qualified candidates quickly, make fair hiring decisions, reduce manual effort, and improve the overall recruitment experience.
Hear	Feedback from hiring managers, HR teams, candidates, and organizational leadership

	regarding hiring priorities, interview outcomes, and recruitment performance.
See	Large volumes of candidate applications, multiple job openings, interview schedules, recruitment dashboards, AI-generated candidate scores, and approval workflows.
Say & Do	Review candidate profiles, schedule interviews, evaluate AI recommendations, approve offers, update recruitment records, communicate with candidates, and monitor hiring progress.
Pain	Manual resume screening, delayed approvals, inconsistent candidate evaluations, fragmented recruitment data, repetitive administrative tasks, and slow communication with applicants.
Gain	AI-powered candidate screening, automated recruitment workflows, centralized recruitment management, real-time dashboards, faster hiring decisions, improved collaboration, and a better candidate experience.

2.3 Brainstorming

Brainstormed Ideas

- Manual recruitment management using paper-based records
- Spreadsheet (Excel)-based candidate tracking system
- Web-based recruitment management application
- AI-powered recruitment platform with automated candidate screening
- Salesforce-based Recruitment & Candidate Management System
- Automated interview scheduling and email notification system
- AI-driven candidate scoring and hiring recommendation engine
- Recruitment analytics dashboards for hiring insights

Selected Idea:

Salesforce-based AI-Powered Job Recruitment & Candidate Management System (AIRCMS) that leverages Salesforce Flows, Approval Processes, Lightning Experience, and Agentforce AI to automate candidate screening, recruitment workflows, interview management, hiring approvals, notifications, and recruitment analytics for faster, smarter, and more efficient hiring.

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login to Salesforce
- Access the AI-Powered Job Recruitment & Candidate Management System (AIRCMS)
- Create and Manage Job Openings
- Register and Manage Candidate Applications
- AI Candidate Screening and Scoring
- Schedule and Conduct Interviews
- Review Hiring Recommendations
- Process Offer Approvals
- Generate Recruitment Reports and Dashboards
- Candidate Onboarding and Recruitment Completion

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login and Authentication
FR-2	Candidate and Job Opening Management
FR-3	AI-Powered Candidate Screening and Scoring
FR-4	Interview Scheduling and Management
FR-5	Offer Approval Workflow Automation
FR-6	Recruitment Reports, Dashboards, and Email Notifications

Non-Functional Requirements

NFR-1: Usability

The system should be easy to use for recruiters, hiring managers, HR administrators, and candidates without requiring extensive technical knowledge.

Requirements

- Simple and intuitive Salesforce Lightning interface
- Easy navigation between recruitment modules
- User-friendly forms for candidate and job management
- Interactive dashboards for recruitment analytics

Example

A recruiter should be able to log in, create a job opening, review AI-generated candidate scores, and schedule interviews within a few minutes without additional training.

Salesforce Lightning Experience provides a responsive and easy-to-use interface with drag-and-drop customization.

NFR-2: Security

The system must protect recruitment data and ensure that only authorized users can access sensitive information.

Requirements

- Role-based access control
- Secure user authentication
- Object-level and field-level security
- Encrypted storage of candidate information
- Secure approval workflows

Examples

- Recruiters can manage candidate records.
- Hiring Managers can approve job offers.
- HR Administrators can configure system settings.
- Unauthorized users cannot access confidential recruitment information.

Salesforce Profiles, Permission Sets, and Sharing Rules enforce secure access.

NFR-3: Reliability

The recruitment system should consistently perform recruitment operations without losing candidate or hiring data.

Requirements

- Automatic record saving
- Reliable workflow execution
- Regular cloud backups
- Robust error handling mechanisms

Example

If a recruiter is updating a candidate's interview details and the internet connection is interrupted, the system should preserve the entered data and synchronize it when connectivity is restored.

Salesforce cloud infrastructure provides automatic backups and high reliability.

NFR-4: Performance

The system should process recruitment activities efficiently and respond quickly, even with large volumes of recruitment data.

Requirements

- Fast page loading
- Quick AI candidate evaluation
- Rapid dashboard rendering
- Efficient report generation
- Minimal response time

Example

A hiring manager generating recruitment reports for hundreds of candidates should receive the report within a few seconds.

Salesforce optimization and cloud infrastructure ensure fast system performance.

NFR-5: Availability

The recruitment platform should remain available whenever recruiters and hiring managers need to access it.

Requirements

- 24×7 availability
- Cloud-based hosting
- Minimal downtime
- Disaster recovery support

Example

Recruiters should be able to review candidate applications and update recruitment records at any time, including weekends and outside business hours.

Salesforce provides enterprise-grade uptime and availability.

NFR-6: Scalability

The system should support organizational growth by handling increasing recruitment activities without degrading performance.

Requirements

- Support more recruiters and hiring managers
- Handle thousands of candidate records
- Expand storage as recruitment grows
- Maintain consistent system performance

Example

If the organization expands its hiring across multiple departments or locations, the AIRCMS should efficiently manage a significantly larger number of job openings, candidate applications, and recruitment workflows without affecting response times.

Salesforce's scalable cloud platform automatically accommodates increased workloads while maintaining performance.

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning Experience
Database	Salesforce CRM (Standard & Custom Objects)
Automation	Salesforce Flow, Approval Processes, Email Alerts
AI Services	Agentforce AI (AI-powered candidate screening, scoring, and recommendations)
Backend	Salesforce Platform

Security	Salesforce Profiles, Permission Sets, Roles, Sharing Rules
Analytics	Salesforce Reports & Dashboards
Notifications	Salesforce Email Alerts & Workflow Automation

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The **AI-Powered Job Recruitment & Candidate Management System (AIRCMS)** replaces traditional manual recruitment processes with an intelligent, automated recruitment platform built on Salesforce. The system centralizes candidate records, job openings, interview management, and hiring approvals into a single secure environment.

AI-powered candidate scoring and recruitment recommendations eliminate manual resume screening and reduce bias in candidate evaluation. Salesforce Flows and Approval Processes automate repetitive recruitment tasks, email notifications, and hiring approvals, minimizing delays and improving operational efficiency.

Interactive reports and dashboards provide recruiters and hiring managers with real-time recruitment insights, candidate pipeline tracking, and hiring analytics, enabling faster and more informed hiring decisions while maintaining transparency, security, and data integrity.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized recruiters, hiring managers, and HR administrators to securely access the AIRCMS using Salesforce authentication.
Candidate Management	Enables users to create, view, update, and manage candidate profiles, resumes, skills, experience, and application status.
Job Opening Management	Allows recruiters to create, modify, and manage job openings, required skills, departments, and hiring requirements.
AI Candidate Screening	Automatically evaluates candidates using Agentforce AI to generate candidate scores, summaries, priority indicators, and hiring recommendations.
Interview Management	Supports scheduling interviews, recording interviewer feedback, and

	tracking interview progress throughout the recruitment lifecycle.
Offer Approval Process	Automates salary offer approvals using Salesforce Approval Processes before offers are sent to candidates.
Validation Rules	Ensures accurate recruitment data by validating mandatory fields such as email addresses, phone numbers, experience, and application details.
Record Types & Page Layouts	Provides customized page layouts and record types for Candidates, Job Openings, Recruiters, and Hiring Managers based on user roles.
Global Picklists	Maintains standardized values for recruitment fields such as Candidate Status, Interview Stage, Job Type, Department, and Offer Status.
Email Notification System	Sends automated email notifications for interview schedules, application updates, high-priority candidate alerts, and offer approvals.
Workflow & Flow Automation	Automates candidate status updates, interview scheduling, approval routing, email alerts, and other recruitment processes using Salesforce Flows.
Recruitment Reports	Generates reports on candidate applications, interview performance, recruiter activities, hiring status, and recruitment metrics.
Dashboard Visualization	Displays real-time recruitment analytics, hiring pipeline, AI candidate insights, approval status, and recruiter performance through interactive dashboards.
Data Backup & Recovery	Ensures secure storage, backup, and recovery of recruitment data using Salesforce Cloud infrastructure.
User Role Management	Controls access to recruitment data using Salesforce Profiles, Roles, Permission Sets, and Sharing Rules to maintain security and compliance.

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Salesforce Lightning Experience

- Lightning App

- Custom Tabs
- Page Layouts
- Record Types
- User-friendly UI for Recruiters, Hiring Managers, and HR Administrators

2. **Application Layer – Salesforce Automation**

- Salesforce Flows
- Approval Processes
- Validation Rules
- Email Alerts
- Agentforce AI for candidate evaluation and recommendations

3. **Data Layer – Salesforce Objects**

- Candidate Object
- Job Opening Object
- Interview Object
- Offer Object
- Recruiter Object
- Relationships and Global Picklists

4. **Analytics Layer – Reports & Dashboards**

- Recruitment Reports
- Candidate Pipeline Dashboard
- Recruiter Performance Dashboard
- Hiring Analytics Dashboard
- Approval Status Reports

This layered architecture ensures modularity, scalability, security, automation, and maintainability while providing an intelligent recruitment management platform.

5. **PROJECT PLANNING & SCHEDULING**

5.1 **Project Planning**

- The project followed an **Agile development methodology** with multiple milestones and sprint-based implementation.

- A **Salesforce Developer Edition** account was created as the development environment.
- Custom objects were designed to manage **Candidates, Job Openings, Interviews, and Offers**.
- Custom Tabs and a **Lightning Application** were developed for centralized recruitment management.
- Custom fields, object relationships, and global picklists were configured to maintain standardized recruitment data.
- Page Layouts and Record Types were customized based on recruiter and hiring management requirements.
- Validation Rules were implemented to ensure accurate candidate and recruitment data.
- Email Templates and Salesforce Flows were created to automate candidate notifications and recruitment activities.
- Approval Processes were configured to automate offer approval workflows.
- Agentforce AI was integrated to provide AI-generated candidate scoring and hiring recommendations.
- Reports and Dashboards were developed to monitor recruitment progress and hiring performance.
- Continuous sprint reviews and testing were conducted to validate each milestone before deployment.
- The project was completed successfully according to the planned development schedule.

Product Backlog & Sprint Schedule

Sprint	Epic	User Story No.	User Story / Task	Story Points	Priority	Team Member
Sprint-1	Environment Setup	US-1	Create Salesforce Developer Edition and configure the project environment.	2	High	Member-1
Sprint-1	Data Modeling	US-2	Create Candidate, Job Opening, Interview, and Offer custom objects.	5	High	Member-2

Sprint-1	Navigation	US-3	Create custom tabs for recruitment objects.	3	High	Member-3
Sprint-2	Lightning App	US-4	Build the AI-Powered Recruitment Lightning Application.	3	High	Member-4
Sprint-2	Data Modeling	US-5	Create custom fields, relationships, and Global Picklists.	5	High	Member-1
Sprint-2	UI Design	US-6	Configure Page Layouts and Record Types for recruitment processes.	5	High	Member-2
Sprint-3	Data Validation	US-7	Implement Validation Rules to ensure accurate recruitment data.	3	High	Member-3
Sprint-3	Automation	US-8	Create Email Templates and Email Alerts for candidate communication.	4	High	Member-4
Sprint-4	Automation	US-9	Develop Salesforce Flows for recruitment workflow automation.	5	High	Member-1
Sprint-4	AI Integration	US-10	Configure Agentforce AI for candidate scoring and recruitment recommendations.	5	High	Member-2
Sprint-5	Deployment	US-11	Deploy the Agentforce AI assistant for recruiters and hiring managers.	4	Medium	Member-3

Project Tracker, Velocity & Burndown

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed	Sprint Status
Sprint-1	20	6 Days	Week-1	Week-1	20	Completed
Sprint-2	20	6 Days	Week-2	Week-2	20	Completed
Sprint-3	20	6 Days	Week-3	Week-3	20	Completed
Sprint-4	20	6 Days	Week-4	Week-4	20	Completed
Sprint-5	20	6 Days	Week-5	Week-5	20	Completed

6. PROJECT DEVELOPMENT PHASE

Project Flow

Milestone No.	Milestone Name
Milestone 1	Salesforce Developer Account Creation
Milestone 2	Object Creation
Milestone 3	Tabs
Milestone 4	Custom Fields
Milestone 5	Validation Rules
Milestone 6	Approval Process
Milestone 7	Email Templates
Milestone 8	Email Alerts
Milestone 9	Declarative Automation (Flows)
Milestone 10	Agentforce AI
Milestone 11	Lightning App
Milestone 12	Editing of Page Layouts
Milestone 13	Dynamic Forms
Milestone 14	Users
Milestone 15	Duplicate and Matching Rules
Milestone 16	Profiles
Milestone 17	Roles and Role Hierarchy

Activities Covered Under Each Milestone

Milestone	Activities
Milestone 1	Creating Developer Account, Account Activation
Milestone 2	Create Candidate, Job Opening, and Candidate Application Objects
Milestone 3	Create Custom Tabs
Milestone 4	Create Custom Fields

Milestone 5	Create Validation Rules
Milestone 6	Create Approval Process and Approval Steps
Milestone 7	Create Email Templates
Milestone 8	Create Email Alerts
Milestone 9	Record-Triggered Flow, Scheduled Flow, Screen Flow
Milestone 10	Agentforce Setup, Prompt Templates, AI Agent, Data Library, Agent Deployment
Milestone 11	Create Lightning App
Milestone 12	Edit Page Layouts
Milestone 13	Enable Dynamic Forms
Milestone 14	Create Recruiter and Hiring Manager Users
Milestone 15	Create Matching Rules and Duplicate Rules
Milestone 16	Create Recruiter Profile and Hiring Manager Profile
Milestone 17	Create Hiring Manager Role and Recruiter Role

What You'll Learn

1. Salesforce Developer Environment Setup
2. Standard and Custom Objects
3. Global Picklists
4. Fields and Object Relationships
5. Lightning Applications
6. Page Layouts
7. Record Types
8. Validation Rules
9. Email Templates & Email Alerts
10. Salesforce Flows
11. Approval Processes
12. Agentforce AI Configuration & Deployment
13. Reports and Dashboards
14. End-to-End AI-Powered Recruitment Automation

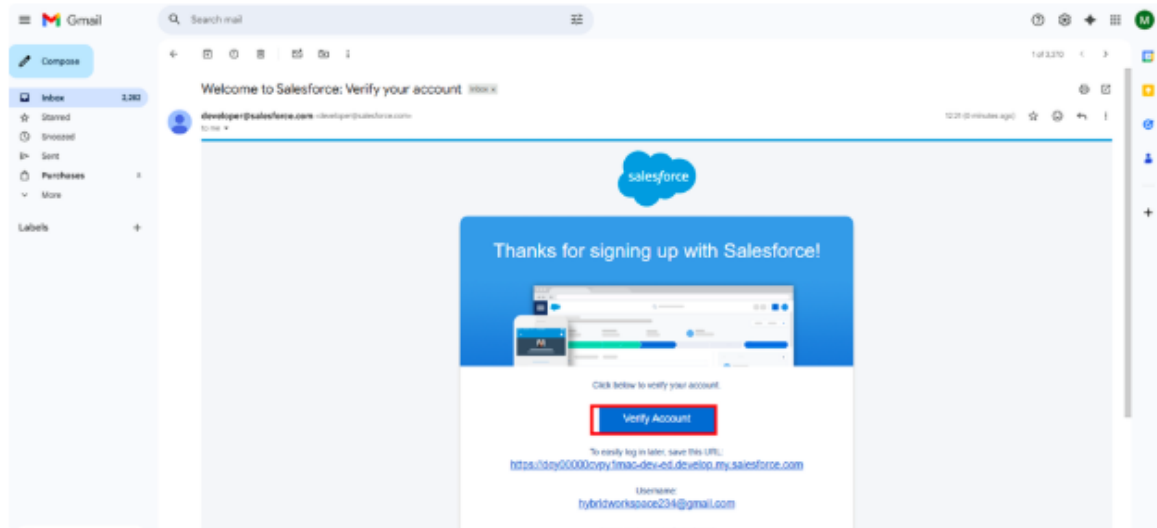

IMPLEMENTATION

Milestone 1 – Salesforce Developer Account Creation

Activity 1: Creating Developer Account

Objective:

Create a Salesforce Developer Organization to build and deploy the **AI-Powered Recruitment & Candidate Management System**.

Steps

1. Open a web browser and navigate to the Salesforce Developer signup page:
<https://developer.salesforce.com/signup>
2. Fill in the registration form with the following details:
 - **First Name:** Your First Name
 - **Last Name:** Your Last Name
 - **Email Address:** Your Email Address
 - **Role:** Developer
 - **Company:** Your College Name
 - **Country:** India
 - **Postal Code:** Your PIN Code
 - **Username:** Enter a unique username in email format.

Example:

yourname@recruitmentproject.com

Change Your Password

Enter a new password for
hybridworkspace234@gmail.com. Make sure to include
at least:

- 8 characters
- 1 letter
- 1 number

New Password

Good

Confirm New Password

Match

New Security Question

In what city were you born?

New Answer

Guntur Good

*required

Change Password

Password will not change for 30 and 30 minutes. See help.

Note: The username must be unique across all Salesforce organizations. It does not have to be an actual email address.

3. Read and accept the Terms and Conditions.
4. Click **Sign Me Up**.
5. Salesforce will display a confirmation message indicating that a verification email has been sent to the registered email address.

Expected Output:

The developer account registration request is successfully submitted.

Activity 2: Account Activation

Objective:

Activate the Salesforce Developer Organization and log in for the first time.

Steps

1. Open the inbox of the email address used during registration.
2. Wait for the Salesforce verification email (this may take **5–10 minutes**).
3. Open the email and click **Verify Account**.
4. Create a secure password for the Salesforce account.
5. Select a Security Question and provide its answer.
6. Click **Change Password**.
7. After successful verification, Salesforce redirects you to the Developer Organization.
8. Log in using the registered username and newly created password.

9. The Salesforce Lightning Home page is displayed, indicating that the developer organization is ready for project development.

Expected Output:

The Salesforce Developer Account is successfully activated, and the user can access the Salesforce Lightning Experience.

fast and get hands-on with
Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag and drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Sign me up

Milestone 2 – Objects

1. In your Salesforce org, click the **Gear** icon on the top right and select **Setup**.
2. Click the **Object Manager** tab. If you don't see it, enter **Object Manager** in the Quick Find box.
3. On the Object Manager page, click **Create** → **Custom Object**.

Activity 1: Candidate Object

1. From the Setup page → Click **Object Manager** → Click **Create** → Click **Custom Object**.
- **Label:** Candidate
 - **Plural Label:** Candidates
 - **Record Name:** Candidate Name
 - **Data Type:** Text

Optional Features

- ✓ Allow Reports
- ✓ Allow Activities
- ✓ Track Field History

Search Status

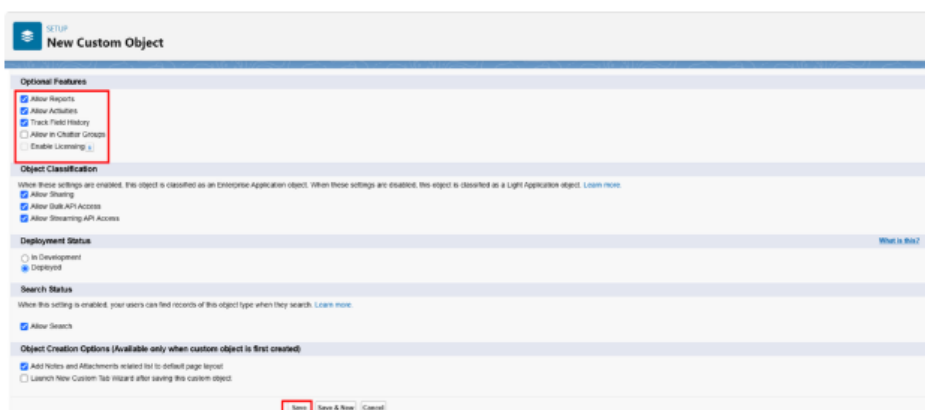

- ✓ Allow Search

Click **Save**.

Screenshot: Candidate Object Creation

Activity 2: Job Opening Object

1. From the Setup page → Click **Object Manager** → Click **Create** → Click **Custom Object**.
 - **Label:** Job Opening
 - **Plural Label:** Job Openings
 - **Record Name:** Job Title
 - **Data Type:** Text

Optional Features

- ✓ Allow Reports

- ✓ Allow Activities
- ✓ Track Field History

Search Status

- ✓ Allow Search

Click **Save**.

Screenshot: Job Opening Object Creation

Activity 3: Interview Object

1. From the Setup page → Click **Object Manager** → Click **Create** → Click **Custom Object**.
 - **Label:** Interview
 - **Plural Label:** Interviews
 - **Record Name:** Interview ID
 - **Data Type:** Auto Number

Display Format: INT-{0000}

Starting Number: 1

Optional Features

- ✓ Allow Reports
- ✓ Allow Activities
- ✓ Track Field History

Search Status

- ✓ Allow Search

Click **Save**.

Milestone 3 – Tabs

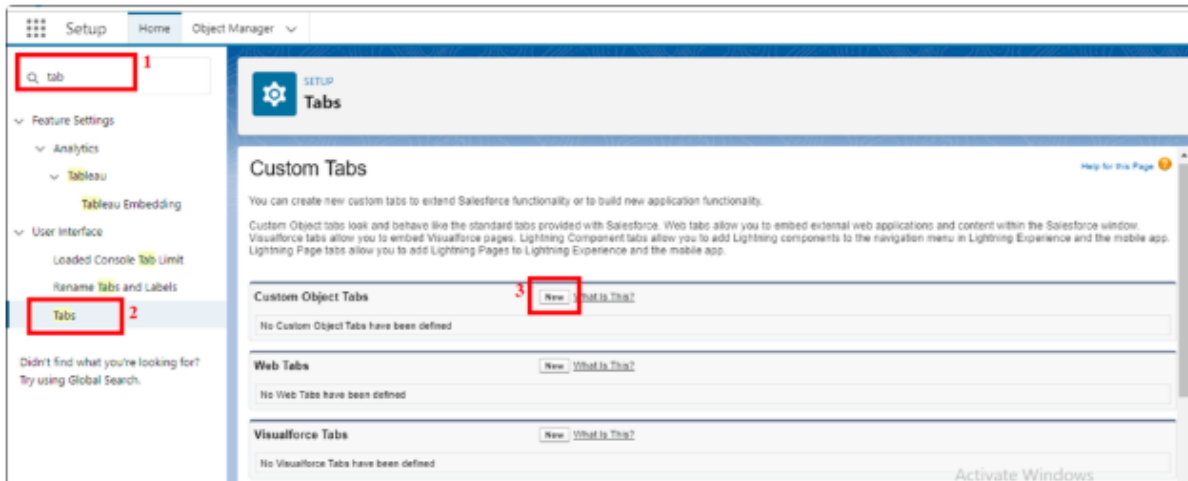

Activity 1: Create Custom Tabs

Objective

Create custom tabs for all recruitment-related custom objects so users can easily access them from the Salesforce navigation menu.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Tabs**.
3. Click **Tabs**.
4. Under **Custom Object Tabs**, click **New**.

Create Candidate Tab

- **Object:** Candidate
- **Tab Style:** Choose any recruitment/person-related icon.
- Click **Next**.
- **Add to Profiles:** Leave the default settings.
- Click **Next**.
- **Add to Custom Apps:** Uncheck **Include Tab** (if following the reference exactly).
- Ensure **Append tab to users' existing personal customizations** is checked.
- Click **Save**.

Create Job Opening Tab

Repeat the same steps.

- **Object:** Job Opening
- **Tab Style:** Select a suitable job/work icon.
- Click **Next** → **Next** → **Save**

Create Interview Tab

Repeat the same steps.

- **Object:** Interview

- **Tab Style:** Select a suitable interview/calendar icon.
- Click **Next** → **Next** → **Save**.

Milestone 4 – Create Custom Fields

Activity 1: Contact (Candidate)

Go to:

Setup → **Object Manager** → **Contact** → **Fields & Relationships** → **New**

Create the following fields:

Field Label	Data Type	Values / Properties
Candidate ID	Auto Number	Display Format: C-{0000} , Starting Number: 1
Experience Level	Picklist	Fresher, Mid-Level, Senior
Application Status	Picklist	New, Screening, Interview, Offer, Hired

The screenshot shows the Salesforce Setup interface. The breadcrumb trail is: **Setup** > **Object Manager** > **Candidate Application**. The left sidebar shows the navigation menu with **Fields & Relationships** selected. The main content area is titled **New Relationship** and shows **Step 3 of 6: Enter the label and name for the lookup field**. The form contains the following fields:

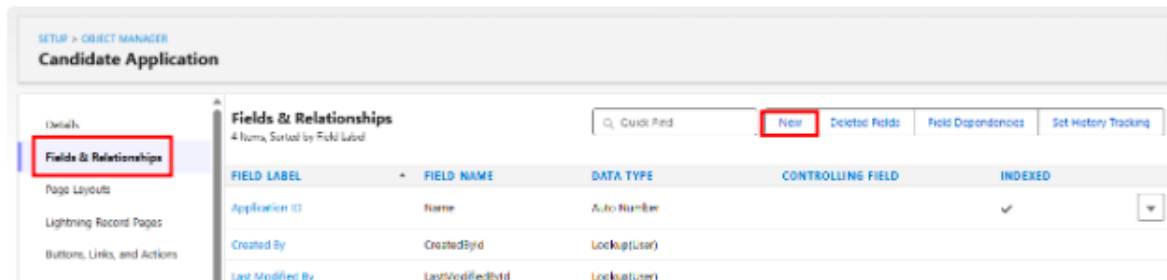

- Field Label:**
- Field Name:**
- Description:**
- Help Text:**
- Child Relationship Name:**
- Sharing Setting:** (with a tooltip: "Select the minimum access level required on the Master record to create, edit, or delete related Detail records. Read Only: Allow users with at least Read access to the Master record to create, edit, or delete related Detail records.")

Navigation buttons at the top right include **Previous**, **Next**, and **Cancel**. A **Help for this Page** icon is also present.

2. Click on Fields & Relationship

3. Click on New.

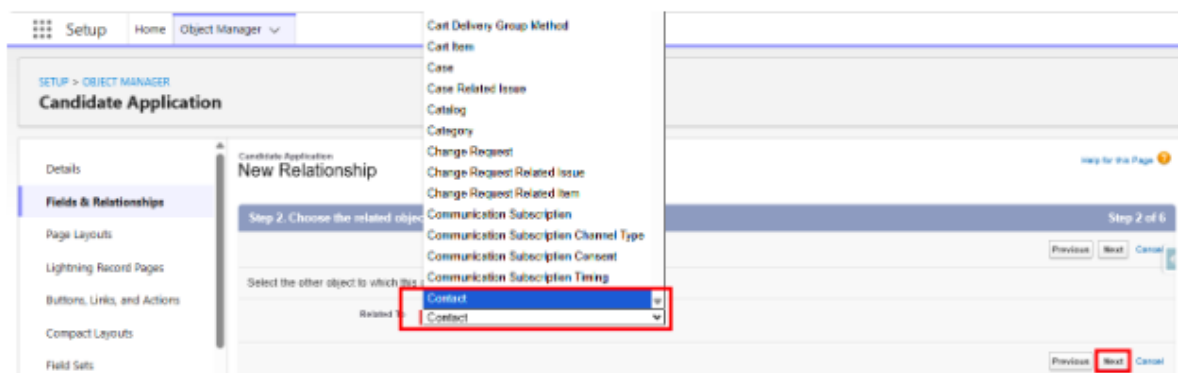

Activity 2: Job Opening

Go to:

Setup → Object Manager → Job Opening → Fields & Relationships → New

Create these fields:

Field Label	Data Type	Values
Department	Picklist	IT, HR, Finance, Sales
Salary Range	Currency	Length: 16, Decimal Places: 2
Vacancies	Number	Length: 3 or 5, Decimal Places: 0
Job Status	Picklist	Open, Closed, On Hold

Activity 3: Candidate Application

Go to:

Setup → Object Manager → Candidate Application → Fields & Relationships → New

Create these fields:

The screenshot shows the Salesforce Object Manager interface for the 'Candidate Application' object. The left sidebar contains navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The main content area is titled 'Step 1: Choose the field type' and includes a 'Next' button. Below the title, it says 'Specify the type of information that the custom field will contain'. Under 'Choose type', there are radio buttons for 'None Selected', 'Auto Number', 'Formula', 'Roll-Up Summary', 'Lookup Relationship', and 'Master-Detail Relationship' (which is selected and highlighted with a red box). To the right, there are descriptions for each type. The 'Master-Detail Relationship' description states: 'Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where: • The relationship field is required on all detail records. • The ownership and sharing of a detail record are determined by the master record.'

1. Candidate

- Data Type: **Master-Detail Relationship**
- Related To: **Contact**

2. Job Opening

- Data Type: **Master-Detail Relationship**
- Related To: **Job Opening**

3. Application Date

- Data Type: **Date**

The screenshot shows the Salesforce Field Updates configuration page. The 'Identification' section includes fields for Name ('Set Approval Status to Appro'), Unique Name ('Set_Approval_Status_to_Appl'), Description, Object ('Candidate Application'), Field to Update ('Approval Status'), Field Data Type ('Picklist'), and a checkbox for 'Re-evaluate Workflow Rules after Field Change'. The 'Specify New Field Value' section shows 'Picklist Options' with three radio buttons: 'The value above the current one', 'The value below the current one', and 'A specific value' (which is selected). The 'A specific value' option has a dropdown menu showing 'Approved'. At the bottom, there are buttons for 'Save', 'Save & New', and 'Cancel'.

Field Updates

Identification

Name: Update Approval Status to R

Unique Name: Update_Approval_Status_to_

Description:

Object: Candidate Application

Field to Update: Approval Status

Field Data Type: Picklist

Re-evaluate Workflow Rules after Field Change: ☒

Specify New Field Value

Picklist Options

☐ The value below the current one

☒ A specific value: Rejected

Save Save & New Cancel

4. AI Candidate Score

- Data Type: **Number**
- Length: **3**
- Decimal Places: **0**

5. Offer Amount

- Data Type: **Currency**
- Length: **16**
- Decimal Places: **2**

6. Application Status

- Data Type: **Picklist**
- Values:

Active

Inactive

7. Approval Status

- Data Type: **Picklist**
- Values:

Pending

Approved

Rejected

Expected Objects After Milestone 4

Contact

- Candidate ID
- Experience Level
- Application Status

Job Opening

- Department
- Salary Range
- Vacancies
- Job Status

Candidate Application

- Candidate (Master-Detail → Contact)
- Job Opening (Master-Detail → Job Opening)
- Application Date
- AI Candidate Score
- Offer Amount
- Application Status
- Approval Status

Milestone 5 – Validation Rules

Activity 1: Create "Offer Amount Validation"

Object

Candidate Application

Steps

1. Go to **Setup**.
2. Open **Object Manager**.
3. Search for **Candidate Application**.
4. Open the object.
5. Click **Validation Rules**.

6. Click **New**.

Enter the following

Rule Name

Offer Amount Validation

Active

- Check the **Active** checkbox.

Error Condition Formula

Offer_Amount__c <= 0

Error Message

Offer amount must be greater than zero.

Error Location

- Select **Top of Page**

Click **Save**.

Activity 2: Create "Job Vacancies Validation"

Object

Job Opening

Steps

1. Setup
2. Object Manager
3. Search **Job Opening**
4. Open the object.
5. Click **Validation Rules**.
6. Click **New**.

Enter the following

Rule Name

Job Vacancies Validation

Active

- Checked

Error Condition Formula

Vacancies__c < 0

Error Message

Vacancies cannot be negative.

Error Location

- **Top of Page**

Click **Save**.

Activity 3: Create "AI Candidate Score Validation"

Object

Candidate Application

Steps

1. Setup
2. Object Manager
3. Candidate Application
4. Validation Rules
5. New

Enter the following

Rule Name

AI Candidate Score Validation

Active

- **Checked**

Error Condition Formula

AI_Candidate_Score__c > 100

Note: Make sure the field API name matches your org. If your field was created as **AI Candidate Score**, the API name is usually:

AI_Candidate_Score__c

(There should **not** be a double underscore between AI and Candidate.)

Error Message

AI Candidate score cannot exceed 100.

Error Location

- **Top of Page**

Click **Save**.

Final Validation Rules

Object	Rule Name	Formula
Candidate Application	Offer Amount Validation	Offer_Amount__c <= 0
Job Opening	Job Vacancies Validation	Vacancies__c < 0
Candidate Application	AI Candidate Score Validation	AI_Candidate_Score__c > 100

Milestone 6: Approval Process

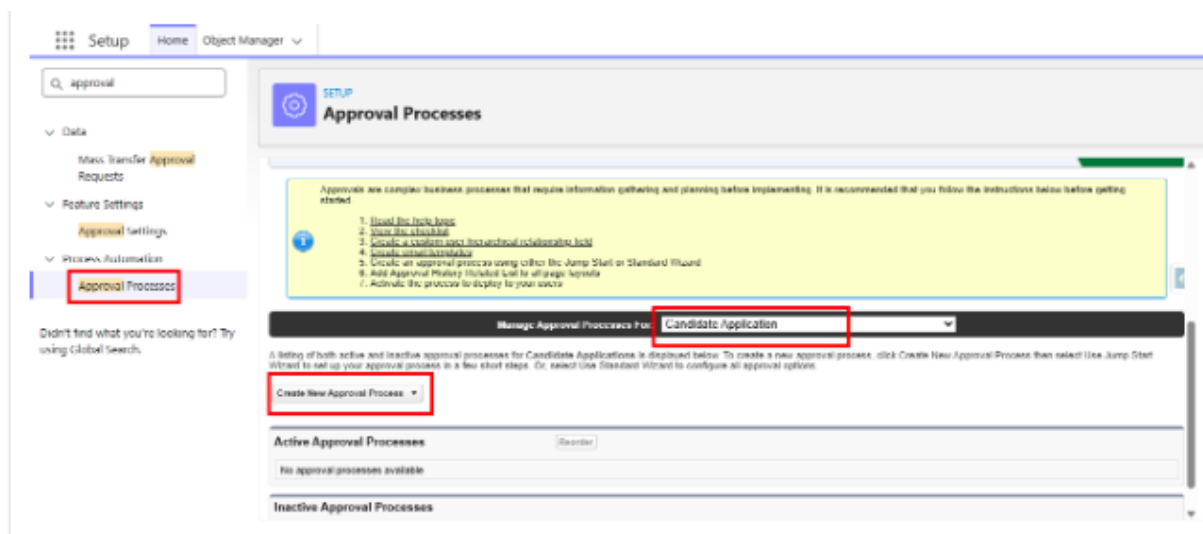

Activity 1: Create an Approval Process for Candidate Offer Approval

Purpose:

Automatically send high-value candidate offers for approval before the offer is finalized. The approval process is created on the **Candidate Application** object using the **Standard Setup Wizard**.

Step 1: Create the Approval Process

- In the **Quick Find** box, type **Approval Processes**.
- Click **Approval Processes** under **Process Automation**.
- Select the object **Candidate Application**.
- Click **Create New Approval Process**.
- Choose **Use Standard Setup Wizard**.

Step 2: Enter Approval Process Information

Fill the details as shown below:

Field	Value
Name	Candidate Offer Approval Process
Unique Name	Candidate Offer Approval Process
Description	Approval process for high-value candidate offers
Entry Criteria	Offer Amount $\geq$ 1000000
Next	Click Next

Step 3: Select the Approver

- Choose **Automatically assign using Queue/User**.
- Select **Hiring Manager** as the approver.
- Click **Next**.

Step 4: Configure Initial Submission Actions

Create the following Initial Submission Actions:

- Field Update → **Application Status = Pending Approval**
- Email Alert → **Notify Hiring Manager**
- Click **Save**.

Step 5: Configure Final Approval Actions

Create the following Final Approval Actions:

- Field Update → **Application Status = Approved**
- Email Alert → **Candidate Offer Approved Notification**
- Click **Save**.

Step 2 of 6

Previous Next Cancel

If only certain types of records should enter this approval process, enter that criteria below. For example, only expense reports from employees at headquarters should use this approval process.

Specify Entry Criteria

Use this approval process if the following :

Field	Operator	Value	
Candidate Application: Offer Amount	greater than	1000000	AND
Candidate Application: Application Status	equals	Offer Submitted	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--

Step 3: Specify Approver Field and Record Editability Properties
Step 3 of 6

Previous Next Cancel

When you define approval steps, you can assign approval requests to different users. One of your options is to use a user field to automatically route these requests. If you want to use this option for any of your approval steps, select a field from the picklist below. Also, when a record is in the approval process, it will always be locked-- only an administrator will be able to edit it. However, you may choose to also allow the currently assigned approver to edit the record.

Select Field Used for Automated Approval Routing

Next Automated Approver Determined By 

Use Approver Field of Contact Owner ☐

Record Editability Properties

☒ Administrators **ONLY** can edit records during the approval process.
☐ Administrators **OR** the currently assigned approver can edit records during the approval process.

Milestone 7: Email Templates

Activity 1: Create a High Priority Candidate Application Notification Email Template

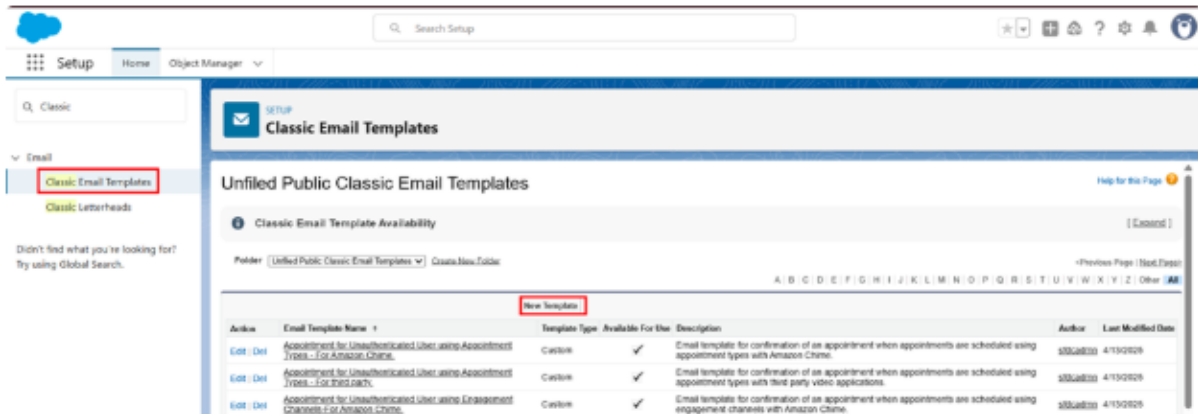

Purpose:

Notify the Recruiter when a candidate application is identified as high priority by AI and requires immediate attention.

Step 1: Open Email Templates

- Go to **Setup** (⚙️ Gear Icon).
- In the **Quick Find** box, type **Email Templates**.

- Click **Classic Email Templates**.
- Click **New Template**.

Step 2: Select the Email Template Type

Choose the template type:

- **Text** – Plain text (No formatting)
- Click **Next**.

Step 3: Enter Template Details

Fill in the following information:

Field	Value
Folder	Unfiled Public Email Templates (or your preferred folder)
Available For Use	✓ Checked
Email Template Name	High Priority Candidate Application Notification
Template Unique Name	High_Priority_Candidate_Application_Notification
Subject	High-Priority Candidate Application Assigned to You

Step 4: Enter the Email Body

Copy and paste the following content into the **Email Body**:

Hello {!Candidate_Application__c.OwnerFullName},

A candidate application has been identified as high priority by AI and requires immediate attention.

Candidate Application Details:

Candidate Name: {!Candidate_Application__c.Candidate__r.Name}

Job Opening: {!Candidate_Application__c.Job_Opening__r.Name}

Experience Level: {!Candidate_Application__c.Candidate__r.Experience_Level__c}

AI Candidate Score: {!Candidate_Application__c.AI_Candidate_Score__c}

Please review the application as soon as possible.

Thank you,

AI-Powered Recruitment & Candidate Management System.

Step 5: Save the Email Template

- Click **Save**.
- The **High Priority Candidate Application Notification** email template is now available for use in Email Alerts and Flows.

Activity 2: Create a High Salary Candidate Offer Approval Notification Email Template

Purpose:

Notify the Hiring Manager when a candidate offer with a high salary package requires approval.

Step 1: Create a New Email Template

- Go to **Setup**.
- Search for **Classic Email Templates**.
- Click **New Template**.
- Select **Text**.
- Click **Next**.

Step 2: Enter Template Details

Field	Value
Folder	Unfiled Public Email Templates
Available For Use	✓ Checked
Email Template Name	High Salary Candidate Offer Approval Notification
Template Unique Name	High_Salary_Candidate_Offer_Approval_Notification
Subject	Approval Required: High Salary Candidate Offer

Step 3: Enter the Email Body

Hello {!Candidate_Application__c.OwnerFullName},

A candidate offer with a high salary package has been submitted for your approval.

Offer Details:

Candidate Name: {!Candidate_Application__c.Candidate__r.Name}

Job Opening: {!Candidate_Application__c.Job_Opening__r.Name}

Proposed Salary: {!Candidate_Application__c.Offer_Amount__c}

Please review and approve the offer at your earliest convenience.

Thank you,

AI-Powered Recruitment & Candidate Management System.

Step 4: Save the Email Template

- Click **Save**.
- The **High Salary Candidate Offer Approval Notification** email template is now ready to be used in Approval Processes and Email Alerts.

Milestone 8: Email Alerts

Activity 1: Create High Priority Candidate Application Email Alert

Purpose:

Automatically notify the Recruiter when a candidate application is identified as high priority by AI.

Steps

1. In the **Quick Find** box, search for **Email Alerts**.
2. Click on **Email Alerts**.
3. Click on **Continue**.
4. Click on **New Email Alert**.
5. Give the **Description** as:

High Priority Candidate Application Email Alert

6. **Unique Name** will be auto-populated.
7. Select the **Object** as:

Candidate Application

8. Select the **Email Template** as:

High Priority Candidate Application Notification

9. For **Recipient Type**, select **User**.
10. Select **Recipient** as:

Candidate Application Owner

11. Click on **Save**.

Activity 2: Create High Salary Candidate Offer Approval Email Alert

Purpose:

Notify the Hiring Manager when a high salary candidate offer is submitted for approval.

Steps

1. In the **Quick Find** box, search for **Email Alerts**.
2. Click on **Email Alerts**.
3. Click on **Continue**.
4. Click on **New Email Alert**.
5. Give the **Description** as:

High Salary Candidate Offer Approval Email Alert

6. **Unique Name** will be auto-populated.
7. Select the **Object** as:

Candidate Application

8. Select the **Email Template** as:

High Salary Candidate Offer Approval Notification

9. For **Recipient Type**, select **User**.
10. Select **Recipient** as:

Manager

11. Click on **Save**.

Activity 3: Create Candidate Application Approval Status Email Alert

Purpose:

Notify the Recruiter when a candidate offer is approved or rejected by the Hiring Manager.

Steps

1. In the **Quick Find** box, search for **Email Alerts**.
2. Click on **Email Alerts**.
3. Click on **Continue**.
4. Click on **New Email Alert**.
5. Give the **Description** as:

Candidate Application Approval Status Email Alert

6. **Unique Name** will be auto populated.
7. Select the **Object** as:

Candidate Application

8. Select the **Email Template** as:

Candidate Application Approval Status Notification

9. For **Recipient Type**, select **User**.
10. Select **Recipient** as:

Candidate Application Owner

11. Click on **Save**.

Milestone 9: Declarative Automation (Flows)

Activity 1: Record-Triggered Flow – High Priority Candidate Application Notification

Purpose:

Automatically notify the Recruiter (Application Owner) when a candidate application is identified as high priority by AI.

Trigger Condition:

AI_Candidate_Score__c ≥ 85

Steps

1. From **Setup**, in the **Quick Find** box, search for **Flows**.
2. Click **New Flow**.
3. Select **Category: Triggered**.

4. Select **Type: Record-Triggered Flow**.
5. Select **Object: Candidate Application**.
6. Configure the trigger:
 - **When:** A record is created or updated.
7. Set the **Entry Conditions**:
 - **Field:** AI Candidate Score
 - **Operator:** Greater Than or Equal
 - **Value:** 85
8. Select:
 - **Run Every time a record is created and meets the condition requirements.**
9. Optimize the flow for **Actions and Related Records**.
10. Click the + icon and add the **Action** element.
11. Select **Action Type: Email Alert**.
12. Select the Email Alert:
 - **High Priority Candidate Application Email Alert**
13. Enter the **Label** as:
 - **High Priority Candidate Application Notification**
14. Map **Record ID** to the **Record Id** field.
15. Click **Save**.
16. Click **Activate**.

Activity 2: Record-Triggered Flow – High Salary Offer Submission for Approval

Purpose:

Automatically submit a candidate offer for approval when a high salary amount is applied.

Trigger Condition:

Offer_Amount__c > 1000000

Steps

1. From **Setup**, search for **Flows**.

2. Click **New Flow**.
3. Select **Category: Triggered**.
4. Select **Type: Record-Triggered Flow**.
5. Select **Object: Candidate Application**.
6. Configure the trigger:
 - **When:** A record is created or updated.
7. Set the **Entry Conditions**:
 - **Field:** Offer Amount
 - **Operator:** Greater Than
 - **Value:** 1000000
8. Select:
 - **Run Every time a record is created and meets the condition requirements.**
9. Optimize the flow for **Actions and Related Records**.
10. Click the + icon and add the **Action** element.
11. Select **Action Type: Submit for Approval**.
12. Select the Approval Process:
 - **High Salary Candidate Offer Approval**
13. Enter the **Label** as:
 - **Submit Candidate Offer for Approval**
14. Map **Record ID** to the **Record Id** field.
15. Click **Save**.
16. Click **Activate**.

Activity 3: Scheduled-Triggered Flow – Pending Candidate Application Follow-Up

Purpose:

Automatically identify candidate applications that are pending approval for more than three days and notify the Recruiter.

Schedule Condition:

Runs Daily

Steps

1. From **Setup**, search for **Flows**.
2. Click **New Flow**.
3. Select **Category: Triggered**.
4. Select **Type: Scheduled-Triggered Flow**.
5. Set the **Start Date and Time** (e.g., Today at **9:00 AM**).
6. Set **Frequency: Daily**.
7. Select **Object: Candidate Application**.
8. Set the **Condition Requirements**:
 - **Approval Status Equals Pending**
9. Add an additional condition:
 - **Last Modified Date Less Than TODAY() – 3**
10. Optimize the flow for **Actions and Related Records**.
11. Click the + icon and add the **Action** element.
12. Select **Action Type: Email Alert**.
13. Select the Email Alert:
 - **Candidate Application Approval Status Email Alert**
14. Enter the **Label** as:
 - **Pending Application Reminder**
15. Map **Record ID** to the **Record Id** field.
16. Click **Save**.
17. Click **Activate**.

Activity 4: Screen Flow – Candidate Application Creation Wizard

Purpose:

Provide a guided, user-friendly process for recruiters to create candidate applications.

Steps

1. From **Setup**, search for **Flows**.
2. Click **New Flow**.

3. Select **Category: Screen Flow**.
4. Click **Create**.
5. Add a **Screen** element.
 - **Screen Name:** Candidate Details
 - Add the following fields:
 - Candidate
 - Job Opening
 - Application Date
6. Add another **Screen** element.
 - **Screen Name:** Offer Details
 - Add the following fields:
 - Offer Amount
 - Experience Level
 - AI Candidate Score
7. Add an **Assignment** element.
 - Configure it to calculate the **Final Offer Amount** (if applicable).
8. Add a **Create Records** element.
 - Create a **Candidate Application** record.
9. Add a **Screen** element for confirmation.
 - **Screen Name:** Confirmation
 - Display the message:
 - **Candidate Application Created Successfully**
10. Save the Flow with the name:
 - **Candidate Application Screen Flow**
11. Click **Activate**.

Milestone 10: Agentforce AI

Activity 1: Enable Agentforce & AI Trust Settings

Purpose:

Enable Agentforce features securely and configure AI Trust settings for recruitment decision-making.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Agentforce**.
3. Click **Agentforce Setup**.
4. Click **Enable Agentforce**.
5. Go to **AI Trust & Permissions**.
6. Enable the following options:
 - **Data Masking**
 - **Zero Data Retention**
 - **Audit Logging**
7. Assign Agentforce access to:
 - **System Administrator Profile**
 - **Hiring Manager Profile**
8. Click **Save**.

Activity 2: Create Prompt Template – Candidate Application Summary**Purpose:**

Generate an AI-based summary of a candidate application for recruiters and hiring managers.

Steps

1. From **Setup**, search for **Prompt Builder**.
2. Click **Prompt Builder**.
3. Click **New Prompt Template**.
4. Select **Prompt Type: Summary**.
5. Select **Object: Candidate Application**.
6. Enter the **Prompt Name** as:

Candidate Application Summary Prompt

7. Enter the following **Prompt Content**:

Summarize the candidate application in simple terms including:

- Candidate Name
- Job Opening Applied
- Experience Level
- Proposed Offer Amount
- AI Candidate Score
- Application Status

Highlight any risks, strengths, or special considerations that may influence the hiring decision.

8. Click **Save and Activate**.

Activity 3: Create Prompt Template – Hiring Risk Analysis

Purpose:

Help hiring managers evaluate whether a candidate application is risky or high value.

Steps

1. Go to **Prompt Builder**.
2. Click **New Prompt Template**.
3. Select **Prompt Type: Flex**.
4. Select **Object: Candidate Application**.
5. Enter the **Prompt Name** as:

Candidate Hiring Risk Analysis Prompt

6. Enter the following **Prompt Content**:

Analyze this candidate application and determine:

- Probability of Successful Hiring
- Financial Risk Based on Proposed Salary
- Candidate Stability and Suitability
- Overall Hiring Risk Level (Low, Medium, High Risk)

Activity 4: Create Recruitment AI Agent

Provide recommendations on whether to approve or reject the candidate offer.

7. Click **Save and Activate**.

Purpose:

Create an AI agent to assist recruiters and hiring managers throughout the recruitment process.

Steps

1. From **Setup**, search for **Agents**.
2. Click **Agents**.
3. Click **New Agent**.
4. Enter the **Agent Name** as:

Recruitment Assistant Agent

5. Enter the **Description** as:

AI agent to assist with candidate screening, offer approvals, and hiring decisions.

6. Assign the following Topics:
 - Candidate Application Summary
 - Hiring Risk Analysis
 - Offer Approval Guidance
7. Click **Next**.

Activity 5: Configure Agent Actions

Purpose:

Configure intelligent actions that the Recruitment Assistant Agent can perform.

Steps

1. Open the **Recruitment Assistant Agent**.
2. Navigate to the **Actions** tab.
3. Click **Add Action**.
4. Add the following actions:
 - **Generate Candidate Application Summary**
 - **Analyze Hiring Risk**

- **Recommend Approval Decision**
- 5. Map each action to its corresponding Prompt Template.
- 6. Click **Save**.

Activity 6: Configure Agent Data Library

Purpose:

Allow Agentforce to answer recruitment-related questions using Salesforce data.

Steps

1. Open **Agent Setup**.
2. Click **Data Library**.
3. Click **Add Objects**.
4. Add the following objects:
 - **Contact (Candidate)**
 - **Job Opening**
 - **Candidate Application**
5. Set the **Access Level** to:

Read Only

6. Enable **Field-Level Access Controls**.
7. Click **Save**.

Activity 7: Test the Agent

Purpose:

Validate the AI agent using recruitment-related records.

Steps

1. Open any **Candidate Application** record.
2. Launch the **Recruitment Assistant Agent**.
3. Ask the following questions:
 - **"Summarize this candidate application."**
 - **"Is this candidate safe to hire?"**

- "What risks are involved in this salary offer?"
4. Verify that the AI-generated responses are accurate, relevant, and easy to understand.

Activity 8: Deploy Agentforce

Purpose:

Deploy the Recruitment Assistant Agent for recruiters and hiring managers.

Steps

1. Go to **Agent Deployment**.
2. Select the **Deployment Type** as:

Lightning Experience

3. Assign the agent to the following users:
 - **Recruiters**
 - **Hiring Managers**
4. Click **Deploy**.

Milestone 11: The Lightning App

Activity 1: Create a Lightning App for "AI-Powered Recruitment & Candidate Management System"

Purpose:

Create a custom Lightning App to provide recruiters and hiring managers with quick access to recruitment-related objects, reports, dashboards, and AI-powered features.

Steps

1. From **Setup**, enter **App Manager** in the **Quick Find** box and select **App Manager**.
2. Click **New Lightning App**.
3. Enter the following details:

Field	Value
App Name	AI-Powered Recruitment & Candidate Management System
Description	Lightning App for AI-Powered Recruitment & Candidate Management System (Optional)

4. Click **Upload Image** and upload an image related to **AI-Powered Recruitment & Candidate Management System**.
5. Click **Next**.
6. Under **App Options**, leave the default selections and click **Next**.
7. Under **Utility Items**, leave the default settings and click **Next**.
8. Under **Navigation Items**, move the following from **Available Items** to **Selected Items**:
 - Candidate Applications
 - Candidates (Contact)
 - Job Opening
 - Accounts
 - Reports
 - Dashboards
9. Click **Next**.
10. Under **User Profiles**, move the following profiles from **Available Profiles** to **Selected Profiles**:
 - System Administrator
 - Recruiter
 - Hiring Manager
11. Click **Save & Finish**.

Expected Output:

A new Lightning App named **AI-Powered Recruitment & Candidate Management System** is successfully created and made available to the selected user profiles.

Milestone 12: Editing of Page Layouts

Activity 1: Edit the Page Layout of Candidate Application Object

Purpose:

Customize the Candidate Application page layout to display all recruitment-related fields in an organized manner.

Steps

1. Go to **Setup**.
2. Click **Object Manager**.
3. In the **Quick Find** box, search for **Candidate Application**.
4. Click on the **Candidate Application** object.
5. Click **Page Layouts**.
6. Open the **Candidate Application Layout**.
7. Drag and arrange the following fields on the layout:
 - Candidate
 - Job Opening
 - Application Date
 - Experience Level
 - AI Candidate Score
 - Offer Amount
 - Application Status
 - Approval Status
8. Arrange the fields in the required sections.
9. Click **Save**.

Activity 2: Edit the Page Layout of Job Opening Object

Purpose:

Customize the Job Opening page layout to display job-related information.

Steps

1. Go to **Setup**.
2. Click **Object Manager**.
3. Search for **Job Opening**.
4. Click on the **Job Opening** object.
5. Click **Page Layouts**.
6. Open the **Job Opening Layout**.
7. Drag and arrange the following fields:

- Job Title
 - Department
 - Experience Level
 - Salary Range
 - Vacancies
 - Job Status
8. Arrange the fields as required.
 9. Click **Save**.

Activity 3: Edit the Page Layout of Account Object

Purpose:

Customize the Account page layout for employer/company information.

Steps

1. Go to **Setup**.
2. Click **Object Manager**.
3. Search for **Account**.
4. Click on the **Account** object.
5. Click **Page Layouts**.
6. Open the **Account Layout**.
7. Drag and arrange the following fields:
 - Account Name
 - Phone
 - Website
 - Industry
 - Billing Address
8. Arrange the fields as required.
9. Click **Save**.

Activity 4: Edit the Page Layout of Opportunity Object

Purpose:

Customize the Opportunity page layout for recruitment opportunity details.

Steps

1. Go to **Setup**.
2. Click **Object Manager**.
3. Search for **Opportunity**.
4. Click on the **Opportunity** object.
5. Click **Page Layouts**.
6. Open the **Opportunity Layout**.
7. Drag and arrange the following fields:
 - Opportunity Name
 - Stage
 - Close Date
 - Amount
 - Account Name
8. Arrange the fields as required.
9. Click **Save**.

Activity 5: Edit the Page Layout of Contact Object**Purpose:**

Customize the Contact page layout to display candidate information.

Steps

1. Go to **Setup**.
2. Click **Object Manager**.
3. Search for **Contact**.
4. Click on the **Contact** object.
5. Click **Page Layouts**.
6. Open the **Contact Layout**.
7. Drag and arrange the following fields:

- Candidate ID
 - First Name
 - Last Name
 - Email
 - Phone
 - Experience Level
 - Application Status
8. Arrange the fields in the desired order.
 9. Click **Save**.

Milestone 13: Dynamic Forms

Activity 1: Create a Dynamic Form in Candidate Application Object

Purpose:

Enable Dynamic Forms for the **Candidate Application** object to provide a modern, flexible, and user-friendly record page layout for recruiters and hiring managers.

Steps

1. Go to **Setup**.
2. Click on the **App Launcher**.
3. Open the **AI-Powered Recruitment & Candidate Management System** app.
4. Click on the **Candidate Application** object tab.
5. Click **New**, create a new **Candidate Application** record, and click **Save**.
6. Open the newly created record.
7. Click the **Gear (⚙️) icon** in the top-right corner and select **Edit Page**.
8. Select the **Details** section on the Lightning Record Page.
9. In the right-side panel, click **Upgrade Now** to enable **Dynamic Forms** for the object.
10. Select the **Candidate Application Layout**.
11. Click **Finish**.
12. Click **Save**.
13. Click **Activate**.

14. Select **Org Default**.
15. Choose **Desktop and Phone**.
16. Click **Next**.
17. Click **Save**.
18. Repeat the same procedure for the remaining objects, such as:
 - **Job Opening**
 - **Contact (Candidate)**
 - **Account**
 - **Opportunity** (if used in the project)

Expected Output

Dynamic Forms are successfully enabled for the **Candidate Application** object, allowing recruiters and hiring managers to view and manage record details through an enhanced Lightning Record Page.

Milestone 14: Users

Activity 1: Create Recruiter User

Note: Before implementing Users, complete the **Profiles** and **Roles** milestones.

Purpose:

Create a Recruiter user who will manage candidate applications, recruitment activities, and hiring processes within the Salesforce application.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Users**.
3. Click **Users**.
4. Click **New User**.
5. Enter the following details:

Field	Value
First Name	Recruiter
Last Name	User
Alias	recru

Email	Your Personal Email Address
Username	Must be unique (Example: recruiter@company.com)

6. Click **Save**.

Activity 2: Create Hiring Manager User

Purpose:

Create a Hiring Manager user responsible for reviewing candidate applications, approving offers, and managing recruitment decisions.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Users**.
3. Click **Users**.
4. Click **New User**.
5. Enter the following details:

Field	Value
First Name	Hiring
Last Name	Manager
Alias	hmgr
Email	Your Personal Email Address
Username	Must be unique (Example: hiringmanager@company.com)
Nickname	HiringManager
Role	Hiring Manager
User License	Salesforce
Profile	Hiring Manager Profile

6. Click **Save**.

Expected Output

- A **Recruiter** user is successfully created with the **Recruiter Profile** and **Recruiter Role**.
- A **Hiring Manager** user is successfully created with the **Hiring Manager Profile** and **Hiring Manager Role**.

- Both users are assigned the **Salesforce User License** and can access the **AI-Powered Recruitment & Candidate Management System** according to their assigned profiles and roles.

Milestone 15: Duplicate and Matching Rules

Activity 1: Create a Custom Matching Rule for Candidate (Contact)

Purpose:

Ensure that each candidate is uniquely identified using their **Email** and **Phone Number**, preventing duplicate candidate records in Salesforce.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Matching Rules**.
3. Click **Matching Rules**.
4. Click **New Rule**.
5. Select **Object: Contact**.
6. Click **Next**.
7. Enter the **Rule Name** as:

Unique Candidate – Email & Phone

8. Under **Matching Criteria**, configure the following:

Field	Matching Method
Email	Exact
Phone	Exact

9. Select **Match Blank Fields**.
10. Click **Next**.
11. Click **Save**.
12. Click **Activate**.

Activity 2: Create a Duplicate Rule for Candidate (Contact)

Purpose:

Detect duplicate candidate records during record creation or editing by using the previously created matching rule.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Duplicate Rules**.
3. Click **Duplicate Rules**.
4. Click **New Rule**.
5. Select **Object: Contact**.
6. Enter the **Rule Name** as: **Unique Candidate Email and Phone**
7. Configure the duplicate rule:

Setting	Value
Action on Create	Allow
Action on Edit	Allow
Report	Enabled

8. In the **Alert Text**, enter: Candidate Email and Phone Number must be unique.
9. Under the **Matching Rules** section, click **Add Rule**.
10. Select the previously created matching rule: **Unique Candidate – Email & Phone**
11. Click **Save**.
12. Click **Activate**.

Expected Output

- A **Matching Rule** is created to compare candidate **Email** and **Phone** fields using the **Exact** matching method.
- A **Duplicate Rule** is activated to identify duplicate candidate records while allowing the record to be saved and reporting the duplicate for review.
- Recruiters receive an alert whenever duplicate candidate information is detected.

Milestone 16: Profiles

Activity 1: Recruiter Profile Creation

Purpose:

Provide recruiters with controlled access to candidate applications, job openings, AI hiring insights, and daily recruitment activities.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Profiles**.
3. Click **Profiles**.
4. Clone the **Standard User** profile.
5. Enter the **Profile Name** as:

Recruiter Profile

6. Click **Save**.
7. While still on the profile page, click **Edit**.
8. Set the **Default Custom App** as:

AI-Powered Recruitment & Candidate Management System

9. Under **Custom Object Permissions**, grant **Read, Create, Edit** access for:
 - Contact (Candidate)
 - Candidate Application
 - Job Opening
10. Grant **Read-Only** access for:
 - Reports
 - Dashboards
11. Set the **Session Timeout** to:
 - **2 Hours of Inactivity**
12. Under **AI & Agentforce Access**, configure:
 - Read access to **AI Candidate Score**
 - No approval or override permissions
13. Configure the **Password Policies**:

Setting	Value
Password Expiration	90 Days
Minimum Password Length	8 Characters

14. Click **Save**.

Activity 2: Hiring Manager Profile Creation

Purpose:

Provide hiring managers with full access to candidate applications, approvals, AI hiring recommendations, and recruitment management.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Profiles**.
3. Click **Profiles**.
4. Clone the **Standard User** profile.
5. Enter the **Profile Name** as:

Hiring Manager Profile

6. Click **Save**.
7. While still on the profile page, click **Edit**.
8. Set the **Default Custom App** as:

AI-Powered Recruitment & Candidate Management System

9. Under **Custom Object Permissions**, grant **Read, Create, Edit, Delete** access for:
 - Contact (Candidate)
 - Candidate Application
 - Job Opening
 - Reports
 - Dashboards
10. Configure the **Approval Permissions**:
 - Can approve/reject high salary offers
 - Can override AI recommendations
11. Under **AI & Agentforce Access**, grant access to:
 - AI Candidate Score
 - Hiring Risk Analysis
 - Hiring Recommendations

12. Set the **Session Timeout** to:

- **2 Hours**

13. Click **Save**.

Expected Output

- A **Recruiter Profile** is created with permissions to manage candidate applications and recruitment activities while having read-only access to reports, dashboards, and AI insights.
- A **Hiring Manager Profile** is created with full access to recruitment records, approval processes, reports, dashboards, and Agentforce AI recommendations.
- Both profiles use the **AI-Powered Recruitment & Candidate Management System** Lightning App as the default application.

Milestone 17: Roles and Role Hierarchy

Activity 1: Creation of Hiring Manager Role

Purpose:

Create the **Hiring Manager** role to manage recruitment operations, candidate approvals, and oversee recruiter activities within the organization.

Steps

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Roles**.
3. Click **Set Up Roles**.
4. Click **Expand All**.
5. Under the **CEO** role, click **Add Role (+)**.
6. Enter the following details:

Field	Value
Label	Hiring Manager
Role Name	Auto Populated

7. Click **Save**.

Activity 2: Creation of Recruiter Role

Purpose:

Create the **Recruiter** role under the **Hiring Manager** role to establish the recruitment hierarchy.

Steps

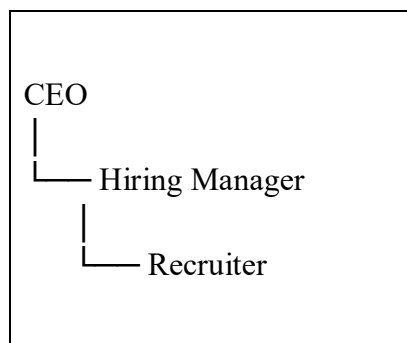

1. Go to **Setup**.
2. In the **Quick Find** box, search for **Roles**.
3. Click **Set Up Roles**.
4. Under the **Hiring Manager** role, click **Add Role (+)**.
5. Enter the following details:

Field	Value
Label	Recruiter
Role Name	Auto Populated

6. Click **Save**.

Expected Output:

The Role Hierarchy is successfully created as follows:

- **Hiring Manager** can view and manage records owned by Recruiters.
- **Recruiters** can manage candidate applications, contacts, and job openings assigned to them.
- The role hierarchy ensures secure data sharing and proper access control within the recruitment process.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the **Salesforce Lightning Experience** to verify the successful implementation and execution of the recruitment management system. The following functionalities were tested:

- Record creation for **Candidate (Contact)**, **Job Opening**, and **Candidate Application** objects.
- Validation rule testing for **Offer Amount**, **AI Candidate Score**, and **Job Vacancies**.
- Verification of **Page Layouts**, **Dynamic Forms**, and **Lightning App** navigation.
- Testing of **Approval Process** for high salary candidate offers.
- Verification of **Email Alerts** and **Email Templates** for recruiter and hiring manager notifications.
- Execution of **Record-Triggered Flows**, **Scheduled Flows**, and **Screen Flow**.
- Testing of **Agentforce AI**, including Prompt Templates, Recruitment Assistant Agent, Agent Actions, and Data Library.
- Verification of **Reports** and **Dashboards** for recruitment analytics.
- Testing of **Duplicate Rules**, **Matching Rules**, **Profiles**, **Roles**, and **Role Hierarchy**.

Performance testing confirmed that the application provides fast response times, reliable automation, secure access control, and stable performance during concurrent recruiter and hiring manager activities.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized management of candidate and job opening information.
- Automated recruitment workflow using Salesforce Flows.
- AI-assisted candidate evaluation through Agentforce.
- Faster recruitment process with automated notifications and approvals.
- Reduced manual effort in candidate screening and offer approval.
- Improved decision-making using AI-generated hiring recommendations.
- Real-time recruitment reports and dashboards.
- Secure access through Profiles, Roles, Approval Processes, and Validation Rules.
- Duplicate candidate detection using Matching Rules and Duplicate Rules.

- Scalable architecture suitable for organizations of different sizes.

Disadvantages

- Requires a Salesforce Developer or Enterprise environment.
- Continuous internet connectivity is required.
- Agentforce AI features require proper configuration and supported editions.
- Initial Salesforce customization requires technical knowledge.
- Limited functionality in offline mode.
- Advanced AI capabilities may require additional Salesforce licenses.

9. CONCLUSION

The **AI-Powered Recruitment & Candidate Management System** successfully streamlines the recruitment lifecycle by integrating candidate management, job opening management, AI-assisted hiring recommendations, approval workflows, and automated notifications within Salesforce CRM.

The system improves recruiter productivity by reducing manual tasks through declarative automation, enhances hiring decisions using Agentforce AI, and provides secure access through Salesforce security features. Real-time reports, dashboards, and intelligent automation enable recruiters and hiring managers to make faster and more informed hiring decisions.

Overall, the project demonstrates the effective use of Salesforce CRM, Flow Automation, Approval Processes, and Agentforce AI to build a modern, intelligent recruitment management solution.

10. FUTURE SCOPE

- AI-based resume parsing and candidate shortlisting.
- Integration with LinkedIn, Naukri, and other recruitment portals.
- Resume upload and automated skill extraction using AI.
- Interview scheduling with Google Calendar and Microsoft Outlook integration.
- WhatsApp, SMS, and Email notifications for candidates.
- Mobile application for recruiters and hiring managers.
- Predictive analytics for hiring success using Salesforce Einstein AI.

- Integration with HRMS and payroll management systems.
- Automated onboarding process after candidate selection.
- Advanced recruitment dashboards with predictive hiring analytics.

11. APPENDIX

Source Code: Salesforce Configuration, Flow Automation, Approval Processes, Validation Rules, Prompt Templates, Agentforce Configuration, Lightning App, Email Alerts, Reports, and Dashboards.

Dataset: Candidate Records, Job Opening Records, Candidate Application Records, Recruiter Data, and Hiring Manager Data.

Tools Used:

- Salesforce Developer Org
- Salesforce Lightning Experience
- Agentforce AI
- Prompt Builder
- Flow Builder
- Approval Processes
- Reports & Dashboards
- Validation Rules
- Email Templates
- Email Alerts
- Dynamic Forms
- Lightning App Builder
