

Project Design Phase
Proposed Solution Template

Date	19 Jul 2026
Team ID	
Project Name	AI-powered Job Recruitment & Candidate Management System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Traditional recruitment processes rely heavily on manual resume screening, candidate tracking, interview scheduling, and approval workflows. These manual activities consume significant time, increase the chances of human error, delay hiring decisions, and reduce the overall recruitment efficiency. Additionally, poor communication and fragmented candidate data negatively impact both recruiters and job applicants.
2	Idea / Solution Description	Develop an AI-Powered Job Recruitment & Candidate Management System using Salesforce CRM, Agentforce AI, Prompt Builder, Flow Builder, Approval Processes, and Lightning Experience . The system automates candidate registration, resume management, job posting, interview scheduling, candidate evaluation, hiring approvals, notifications, and reporting while providing

		AI-generated recommendations for better hiring decisions.
3	Novelty / Uniqueness	The proposed solution integrates Artificial Intelligence with Salesforce CRM to automate the complete recruitment lifecycle. Agentforce AI generates candidate summaries, hiring risk analysis, and intelligent recommendations, while Salesforce automation features streamline workflows, making recruitment faster, more accurate, transparent, and data-driven.
4	Social Impact / Customer Satisfaction	The system benefits recruiters by reducing manual work and improving hiring efficiency. Job applicants receive timely updates, transparent application tracking, and faster recruitment decisions, leading to a better recruitment experience. Organizations benefit from improved productivity, reduced hiring costs, and enhanced talent acquisition.
5	Business Model (Revenue Model)	The solution can be offered as a Software-as-a-Service (SaaS) platform where organizations subscribe on a monthly or annual basis. Revenue can also be generated through premium AI features, enterprise customization, consulting services, technical support, and integration with third-party HR systems.
6	Scalability of the Solution	The application is built on the Salesforce Cloud Platform , which provides high scalability, security, and availability. It can support

		multiple organizations, thousands of recruiters, hiring managers, candidates, and job openings simultaneously. Additional AI features and integrations can be added without major architectural changes, making the solution suitable for both small businesses and large enterprises.
