

## Project Design Phase-II

### Solution Requirements (Functional & Non-functional)

|                      |                                                          |
|----------------------|----------------------------------------------------------|
| <b>Date</b>          | 19 Jul 2026                                              |
| <b>Team ID</b>       |                                                          |
| <b>Project Name</b>  | AI-powered Job Recruitment & Candidate Management System |
| <b>Maximum Marks</b> | 4 Marks                                                  |

### Functional Requirements

Following are the functional requirements of the proposed solution.

| <b>FR No.</b> | <b>Functional Requirement (Epic)</b> | <b>Sub Requirement (Story / Sub-Task)</b>                                                                           |
|---------------|--------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>FR-1</b>   | User Registration                    | Registration through Candidate Registration Form<br>Registration using Email ID<br>Recruiter Registration           |
| <b>FR-2</b>   | User Authentication                  | Login using Username & Password<br>Email Verification<br>Role-based Authentication (Recruiter/Hiring Manager/Admin) |
| <b>FR-3</b>   | Candidate Management                 | Create Candidate Profile<br>Upload Resume<br>Update Candidate Details<br>View Candidate Information                 |
| <b>FR-4</b>   | Job Opening Management               | Create Job Openings<br>Update Job Details<br>Delete Job Openings<br>Assign Recruiter                                |
| <b>FR-5</b>   | Job Application Management           | Apply for Jobs<br>Track Application Status<br>View Applied Jobs                                                     |
| <b>FR-6</b>   | Resume Management                    | Upload Resume<br>Download Resume<br>Store Resume in Salesforce Files                                                |
| <b>FR-7</b>   | Interview Management                 | Schedule Interviews<br>Update Interview Status<br>Send Interview Notifications                                      |
| <b>FR-8</b>   | AI Candidate Evaluation              | Generate Candidate Summary<br>Analyze Candidate Skills<br>Provide AI Recommendations                                |

|              |                         |                                                                                       |
|--------------|-------------------------|---------------------------------------------------------------------------------------|
| <b>FR-9</b>  | Hiring Approval Process | Submit Candidate for Approval<br>Manager Approval/Rejection<br>Approval Notifications |
| <b>FR-10</b> | Workflow Automation     | Record Triggered Flows<br>Email Alerts<br>Status Updates<br>Automatic Notifications   |
| <b>FR-11</b> | Reports & Dashboards    | Recruitment Reports<br>Candidate Statistics<br>Hiring Analytics Dashboard             |
| <b>FR-12</b> | User & Role Management  | Manage Recruiters<br>Manage Hiring Managers<br>Assign Profiles & Roles                |

### Non-Functional Requirements

Following are the non-functional requirements of the proposed solution.

| <b>NFR No.</b> | <b>Non-Functional Requirement</b> | <b>Description</b>                                                                                                                                                |
|----------------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>NFR-1</b>   | Usability                         | The application should provide a simple, user-friendly interface that enables recruiters, hiring managers, and candidates to perform tasks with minimal training. |
| <b>NFR-2</b>   | Security                          | Ensure secure authentication, role-based access control, data encryption, profile permissions, and secure storage of candidate information.                       |
| <b>NFR-3</b>   | Reliability                       | The system should consistently perform recruitment operations without data loss or service interruptions.                                                         |
| <b>NFR-4</b>   | Performance                       | The application should process candidate records, interview scheduling, AI recommendations, and reports with minimal response time.                               |
| <b>NFR-5</b>   | Availability                      | The system should be available 24×7 with high                                                                                                                     |

|               |                    |                                                                                                                                                        |
|---------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
|               |                    | uptime through Salesforce Cloud infrastructure.                                                                                                        |
| <b>NFR-6</b>  | Scalability        | The application should support increasing numbers of recruiters, candidates, job openings, and recruitment activities without performance degradation. |
| <b>NFR-7</b>  | Maintainability    | The system should be easy to update, configure, and maintain using Salesforce Flows, Validation Rules, and Lightning components.                       |
| <b>NFR-8</b>  | Compatibility      | The application should work across modern web browsers and mobile devices through Salesforce Lightning Experience.                                     |
| <b>NFR-9</b>  | Data Integrity     | Candidate records, interview details, and recruitment information should remain accurate, consistent, and validated using Salesforce Validation Rules. |
| <b>NFR-10</b> | Audit & Monitoring | The system should maintain activity logs, approval history, and recruitment records for tracking and compliance purposes.                              |
