

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	19 Jul 2026
Team ID	
Project Name	AI-powered Job Recruitment & Candidate Management System
Maximum Marks	4 Marks

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The project team conducted a brainstorming session to identify real-world problems that could be solved using Salesforce CRM and Artificial Intelligence. Various domains such as healthcare, education, inventory management, customer support, and recruitment were discussed.

After evaluating the feasibility, impact, scalability, and relevance to Salesforce technologies, the team selected the problem of inefficient recruitment and candidate management.

Traditional recruitment processes involve manual resume screening, interview scheduling, candidate tracking, and approval workflows, which consume significant time and resources.

The team agreed to develop an **AI-Powered Job Recruitment & Candidate Management System** that automates recruitment activities, centralizes candidate information, assists recruiters with AI-generated insights, and improves hiring efficiency using Salesforce CRM and Agentforce.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstormed Ideas

Idea No.	Proposed Idea	Category
1	AI-Powered Job Recruitment & Candidate Management System	Human Resources
2	Hospital Patient Management System	Healthcare
3	Smart Inventory Management System	Business
4	Student Performance Analytics Portal	Education
5	AI-Based Customer Support System	Customer Service
6	Employee Leave Management System	Human Resources

7	Online Complaint Management Portal	Public Services
8	Smart Event Registration System	Event Management

Grouping of Ideas

Human Resources

- AI Recruitment System
- Employee Leave Management

Healthcare

- Hospital Patient Management

Education

- Student Performance Analytics

Business

- Inventory Management

Customer Service

- AI Customer Support

Public Services

- Complaint Management

Event Management

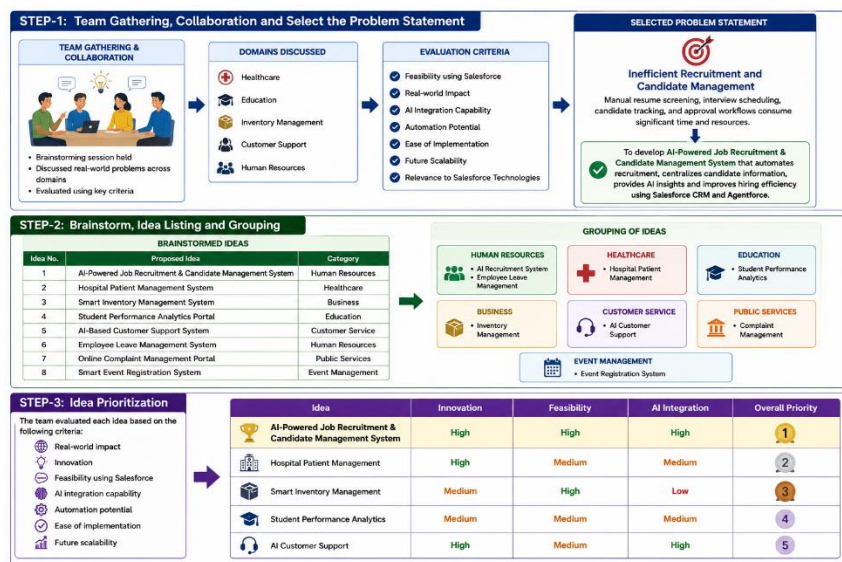

- Event Registration System

Step-3: Idea Prioritization

The team evaluated each idea based on the following criteria:

- Real-world impact
- Innovation
- Feasibility using Salesforce
- AI integration capability
- Automation potential
- Ease of implementation
- Future scalability

Idea	Innovation	Feasibility	AI Integration	Overall Priority
AI-Powered Job Recruitment & Candidate Management System	High	High	High	1
Hospital Patient Management	High	Medium	Medium	2
Smart Inventory Management	Medium	High	Low	3
Student Performance Analytics	Medium	Medium	Medium	4
AI Customer Support	High	Medium	High	5

Final Selected Idea

AI-Powered Job Recruitment & Candidate Management System

Reason for Selection

The team selected this project because recruitment is a critical business process that can benefit significantly from automation and artificial intelligence. The proposed system streamlines the entire hiring lifecycle by managing job openings, candidate applications, interview scheduling, approval workflows, and hiring decisions within Salesforce CRM. AI capabilities such as candidate evaluation, hiring risk analysis, and intelligent recommendations help recruiters make faster and more informed decisions. The solution is scalable, improves productivity, reduces manual effort, and provides an enhanced recruitment experience for both recruiters and candidates.
